• Git

EXPERIENCE

YOUTUBE | DIGITAL CONTENT CREATOR

Dec 2020 – Present

- Averages 500,000 views every month by utilizing effective SEO strategies and maximizing viewer retention.
- Boosted revenue in 2022 by 35% from collaborating with brand sponsorships and monetization strategies.
- Produces consistent, quality content through self-taught skills in commentary, video editing, and marketing techniques.
- Adaptive to changes in platform algorithms and trends to stay competitive in a rapidly evolving industry.

PROJECTS

BINGO FIT | APR 2023 | NEXTJS, PRISMADB, TAILWIND CSS, TYPESCRIPT

- Utilized agile development methodologies to improve team collaboration, increase productivity, and deliver a polished web app within 2 weeks with a small team.
- Designed and integrated a point-based leveling and reward system to incentivize daily play.
- Increased development speed by automating database migrations via Prisma ORM.

SCHEDULER | FEB 2023 | REACT, SQL, JEST, STORYBOOK

- Designed and developed a single-page application that allows users to book, edit, and cancel interview appointments.
- Integrated Axios and Ajax to update information on the page dynamically without refreshing.
- Implemented thorough unit, and integration testing to ensure the application operates as intended and is free of errors.

JUNGLE | DEC 2022 | RUBY, RAILS, POSTGRESQL, SASS, CYPRESS

- Developed features for an E-Commerce site for selling garden plants and shrubs.
- Utilized PostgreSQL database technology to efficiently store and retrieve store inventory, ensuring optimal performance and scalability.
- Implemented end-to-end testing by deploying Cypress to ensure the application operates as intended and with the optimal user experience.
